

Polish Hospital Federation & Polish Medical Mission

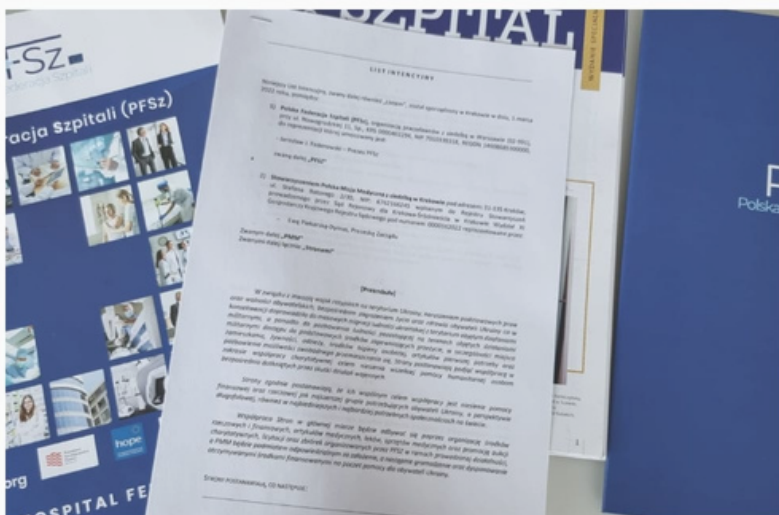

[#ACTtogetherforUkraine](#)

The common goal of cooperation is to provide financial and material assistance to the widest possible group of Ukrainian citizens in need, and in the long term, also to the poorest and most needed communities in the world.

Since 1999, the Polish Medical Mission Association has been helping the victims of wars, disasters and calamities. The activities of the PMM are based on the work of volunteers: doctors, paramedics, nurses, physiotherapists, as well as psychologists and medical analysts.

The direct impulse that led to the establishment of the Association was the humanitarian disaster caused by the outbreak of war in Kosovo and the mass escapes of Albanians from the conflict areas.

They are one of the few Polish non-governmental organisations that provide medical assistance. We help where the needs are the greatest. Assistance is of a long-term nature – it brings lasting changes to the communities we support.

SOS UKRAINE!

Support humanitarian work in Ukraine

DONATE

We are grateful for every penny! The Polish Medical Mission put helpers in touch with the needy. We believe in a world where medical aid reaches every patient.
